

We can devise specific initiatives aimed at the penetration and/or the commercial and industrial development in given geographical areas.

- in these areas, we intervene both in the structuring of existing strategies already devised in-house, as well as in identifying new specific pathways together with the client enterprises;
- we can provide strategic and operational support in devising industrial plans as well as commercial/marketing, contractual, corporate and tax profiles;
- we have solid expertise in all the various aspects of start-up initiatives from market penetration and various forms of contractual and/or corporate alliances, such as joint ventures and similar models, as well as in all the specific forms of bank and other guarantees – performance bonds, bid bonds, etc – to support internationalisation initiatives.
